Full-stack developer with a React and TypeScript background. My independent work includes a parts-request product for web, iOS, and Android, alongside client work on a dog daycare management system.

Selected development work

Deler

February 2026-present

Independent product development

Parts requests and orders for plumbing teams, with a web dashboard and native iOS and Android apps.

I kept the worker's task to choosing parts and quantities. Project leaders handle approval and ordering.

The three apps share PostgreSQL functions for requests and orders. Changes to the backend need to work with installed mobile versions.

Built with React, Next.js, TypeScript, Supabase (PostgreSQL), Stripe, Swift (SwiftUI), Kotlin (Jetpack Compose)

Colchester Canine Creche

Live

Development and maintenance

Client project for a dog daycare in Colchester, England.

I built the daily attendance view for desktop and mobile. A check-in or check-out appears in other open views, with the visit linked to its customer and billing records.

Alongside the dashboard, I'm developing a public website with a private Studio for content and photos.

Built with React, Next.js, TypeScript, Tailwind CSS, TanStack Query, Supabase (PostgreSQL)

benjamin-docs

A command-line tool for keeping project context and decisions in Markdown alongside the code, so AI coding agents can pick up work across sessions.

TypeScript · Published on npm · Source on GitHub

Skills

Web: TypeScript, React, Next.js, Tailwind CSS, TanStack Query
Backend: PostgreSQL, Supabase, database functions, access control
Services: Stripe, Cloudflare Workers
Design and development: Figma, UI design, Git, AI coding agents

Education

2026-2028 **Noroff**, Applied Artificial Intelligence (ongoing)

2024-2025 **Noroff**, UI Design

2022-2024 **Noroff**, Frontend Development

2018-2019 **Bethel School of Technology**, Software Development, a one-year full-stack bootcamp
